

ULTRA 865HD HIGH PERFORMANCE MULTI PURPOSE GREASE

- Contains penetrants, lubricants and greases
- All weather
- Water-resistant
- Penetrates like an oil, then cures to a thick, water-resistant grease
- Recommended for marine, mining, construction, automotive, heavy industrial applications.
- Ideal for chains, bearings, bushings, pins and for any application under severe contamination, high temperature, marine or water contact and where corrosion is a big concern.

ULTIMATE 1000 NEXT GENERATION OF OPEN GEAR GREASE

- Fast tacking formula prevents sling-off
- Contains (moly) to replace for (solid lubricants) and reduce wear from metal-to-metal contact.
- Recoats with each revolution
- Water resistant
- Ideal for heavy loads
- Excellent for wire ropes and cables protection

USE ON: Passenger and freight elevators, drag lines, construction, mining, dredging and earth moving equipment; textile and steel mill machinery, winches, cranes, tugboats, offshore drilling rigs, snow removal equipment and wherever an underwater lubricant is needed.

NBP-14

N-PROPYL BROMIDE SOLVENT DEGREASER

- For Use On Energized Electrical Equipment or as a safety solvent
- Contains No Chlorinated Solvents
- Non-Flammable
- Fast Drying and Residue Free
- 26,800 Volt Dielectric Strength

USE ON: Industrial Equipment, Marine Equipment, Aircraft Parts, Heating and Air Conditioning Equipment, Refrigeration Equipment, Generators, Motors, Windings, Power Tools and Processing Equipment

What is n-propyl bromide?

N-Propyl Bromide is an organobromine compound with the chemical formula $\text{CH}_3\text{CH}_2\text{CH}_2\text{Br}$. It is a colorless liquid that is used as a solvent. It has a characteristic hydrocarbon odor.

DM-1050 PREMIUM DRY MOLY LUBRICANT

- Non-Corrosive and Non-Conductive
- Waterproof
- Acts as a lubricant and protectant
- Film has Low Coefficient of Friction
- Provides Excellent Lubricating and Does Not Attract Dust or Dirt
- Adheres to Metals, Rubber, Glass and Most Plastics
- Inert to Water, Oil, Alkalies, and Many Acids
- Resists Temperatures from -110°F to +1050°F and Pressures to 100,000psi

USE ON: Plastic and rubber parts, door and window seals, sliding surfaces, conveyors and chutes, guides and rails, lawn mowers blades and decks, molding dies, casting and stamping dies, automotive, snow removal equipment, construction and mining equipment, gasket coating, thread lubricant, extrusions and drawings, bolts and sliding parts, furnaces, ovens, kilns, Rubber Moldings, High Temperature, Low Load, or High Rpm Slides, Rollers, Wheels, Gears, Chains, Hoists And where an ant-seize compound is required it can also be used to Any metal surface to protect from water, Heat, pressure, corrosion and rust.

DG-100 PREMIUM CITRUS DEGREASER

- Industrial Strength
- No Chlorinated Solvents or Petroleum Distillates
- Environmentally Safe – Biodegradable
- All Natural Ingredients - No Toxic Fumes
- Non-acid - Non-caustic - Non-corrosive
- The safest alternative to using chlorinated solvents for degreasing and cleaning metal surfaces
- Dissolves and removes grease, grime, asphalt, oil and tar
- Recommended for the effective removal of grease, oil, corrosion and sludge

USE ON: Air tools, mechanical brakes, clutches, chains, wire ropes, motors, dies, molds, parts, bearings, generators, compressors, auto motors, garbage cans and trucks, dumpsters, concrete, masonry, road, farm and construction/industrial equipment.

RTX PLUS PREMIUM RUST EXTERMINATOR

- Eliminates Rust and Stops Corrosion
- Paintable
- No Chlorinated Solvents
- Chemically neutralizes rust and leaves a tough, long term, rust preventative coating
- Seals, protects and prolongs the life of ferrous metal

Once dry, the treated area will be darker in color and more uniform in appearance with a durable, protective finish that can be painted if desired

RMC-40K PREMIUM PENETRATING LUBRICANT

- Non-Chlorinated
- Safe Around Plastic and Paint
- 39,000 Volt Dielectric Strength
- Quickly Cuts Through Rust and Corrosion
- Lubricates Parts to Ensure Free and Easy Movement
- **Penetrant** - Seeps through rust and corrosion to release frozen nuts and bolts.
- **Moisture Displacer** – Low surface tension to creep under water to provide a protective barrier between moisture and the metal surface.
- **Lubricant** – High quality of oils provide superior lubrication even under extreme pressure – resists wear.
- **Rust Preventative** - Protects steel surfaces against salt corrosion and rust in high humidity conditions
- **Cleaner** - Cleans and degreases light soil from surface plates, chucks, wire and other machined or polished metal surfaces

USE ON: Electric motors, contacts, communication assemblies, tools, dies, fasteners, ignitions, hardware, hinges, springs, machinery, heat treated parts, welds, machined surfaces, instruments, weld rod and wire, tubing, castings, bushings, shafts, gears, conveyors and hoists.
